## Osman Ahmed Osman Group of Companies

← SINCE 1974 →

**Osman Group** is a group of companies established by Eng. Osman Ahmed Osman (may his soul rest in peace) in 1974. OG mainly operates in the Architectural Engineering and Construction Industry fields. Other activities of OG include real estate, manufacturing, trading, agriculture, information technology and logistical activities.

OSMAN GROUP

## ABOUT THE FOUNDER

Osman Group momentum today is due in very large part to the leadership, wisdom and foresight of the founding father, Osman Ahmed Osman. We would like to share some of his values, thoughts, and advises quoted from his book, "*Pages from My Experience*":

- The principles that were ingrained in me as a child and to which I devoted my whole life are: telling the truth, mastering the work and punctuality.
- Loss of money is small no matter how large it is, but loss of men is large no matter how small it is.
- It was crucial to choose reliable men who can hold the responsibilities, in order to give my entire attention to what is important. That is my understanding of leadership.
- As I always say, love and loyalty are two sides of the same coin. Without either of them, man stands alone and defenseless in this battle called life.
- I do not believe in coincidence but I believe in hard work.
- I never and will never ever admit to what they call crises.
- It's just poor management which calls for reorganization, in order to solve all problems.
- Your work in this life defends you against all possible rumors. As long as you are sure of yourself, don't waste your time looking back.
- I advise my children to think before they act- always weigh your action ahead of time.
- Honesty is a trait that is not easily recognizable in a man. However with the passage of time and many trials, if it is there, it emerges.
- I earned my success by trying to do what is right, and thankfully God has blessed me with more than I've expected.

### CEO Message

Each generation reaps what the former generation has sown. We are fortunate to have the heritage of an organization that has endured great challenges throughout its history. We have always been led by the values established by our founder, Osman Ahmed Osman; Faith, Integrity, Commitment, and Teamwork. These values are the foundation for our success and will continue into the future. We watch great achievements of successful companies and learn to adapt what suits us, with great respect and appreciation for their experience, resilience and sustainability.

This is the age of information and the internal workings of companies will be exposed to the world and bureaucracies will be seen for what they are: slow, self-absorbed, customer insensitive – even unreasonable. But the right utilization of information technology does more than just create unlimited business opportunities; it outs a small company soul into that big company body and gives it the transparency, excitement and spirit of a start-up.

Osman Group acquires its strength from the experience, talent, skill credibility & devotion of its human resources, either at the leadership level or the shop floor level. Our group is one family that consistently trains, develops, and adapts to changes that make us capable to deal with a dynamic global & unpredictable future business environment. We thank our clients, staff and all the people we work with for our success in the past and the promise of the future.

Since 1974

1940

Eng. Osman Ahmed Osman established his first company: (Osman Ahmed Osman, Engineer and Contractor Co.)

1954

Together with his brothers, Eng. Osman Ahmed Osman established the Industrial and General Enterprise Engineering Company (Osman Ahmed Osman & Co.) to accommodate the expanding volume of work. It would later be renamed The Arab Contractors (Osman Ahmed Osman & Co.)

1961

Nationalization of The Arab Contractors (Osman Ahmed Osman & Co.) took place, while keeping its name and chairmanship under Eng. Osman Ahmed Osman.

1973

Eng. Osman Ahmed Osman was appointed as the Minister of Housing and Reconstruction in Egypt. His brother, Eng. Hussein Ahmed Osman took over the chairmanship of the Arab Contractors Co. and the company continued to flourish. The turnover surpassed \$1 billion and the FTE (Full Time Employees) exceeded 56,000, as the company became the largest contracting firm in the Middle East.

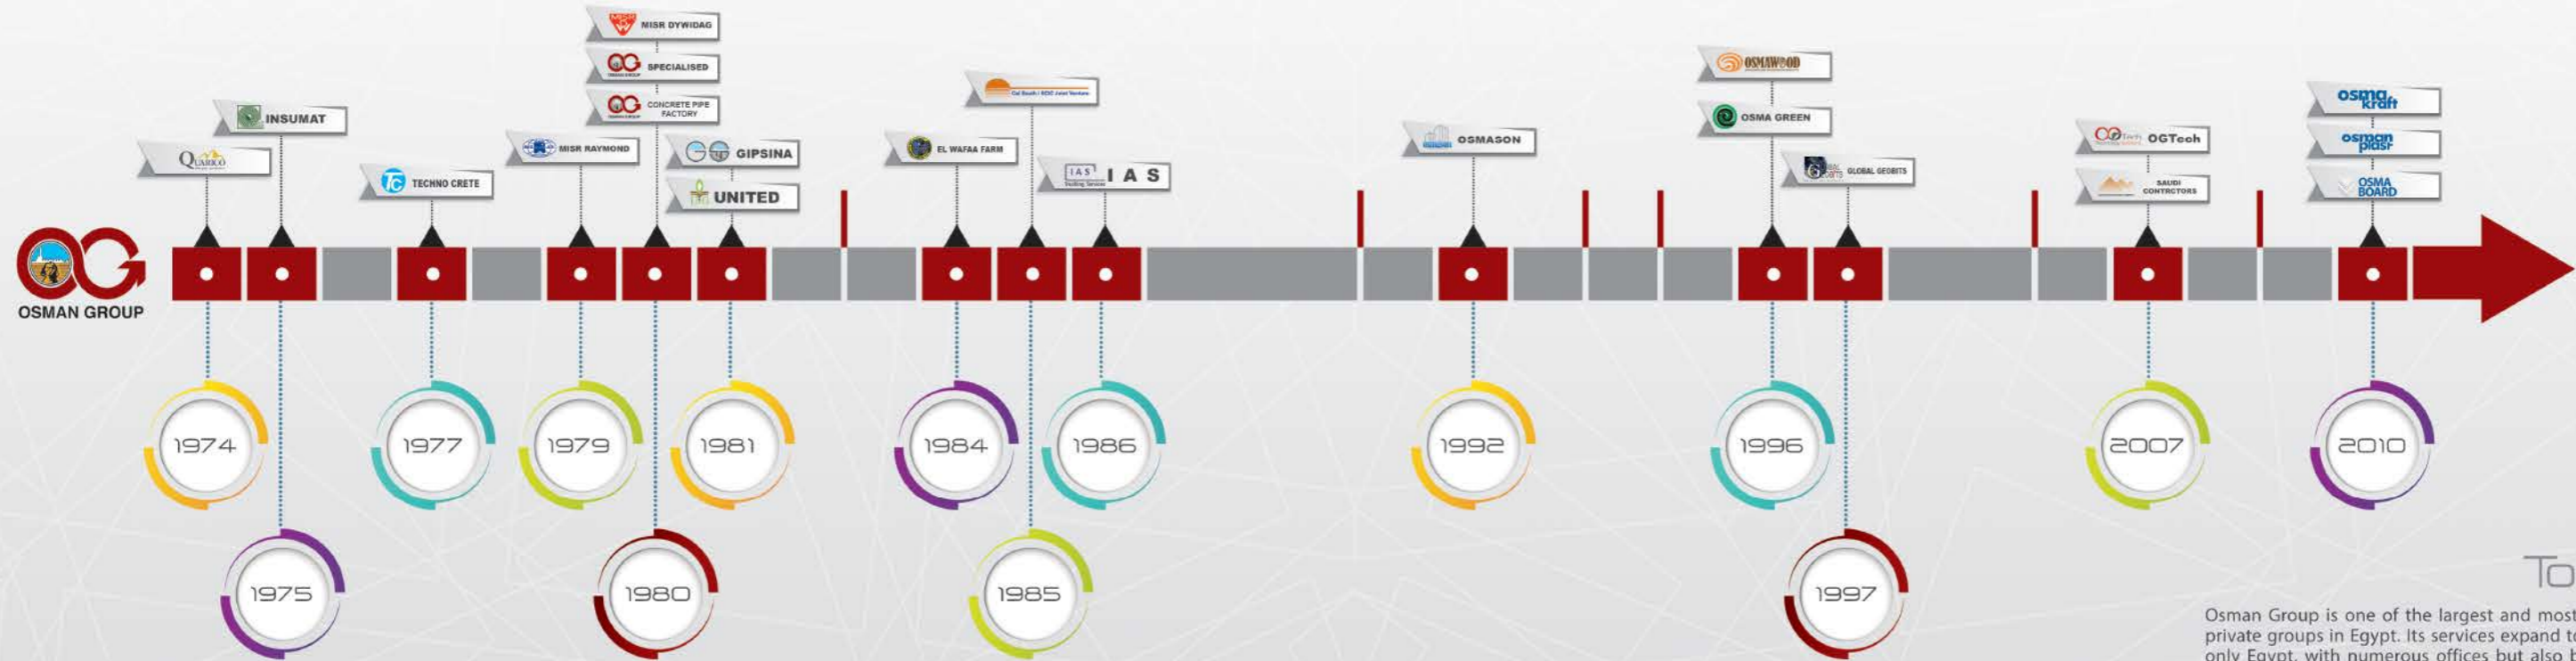

1974

The private sector was allowed to re-establish itself in Egypt under the New Investment Law resulting in the formation of Osman Group, which is privately owned by members of Osman family.

# COMPANIES

t i m e l i n e

Osman Ahmed Osman Group of Companies

Today

Osman Group is one of the largest and most-successful private groups in Egypt. Its services expand to cover not only Egypt, with numerous offices but also branches in the MENA REGION.

We deliver

WOW  
through our products & services

Osman Ahmed Osman Group of Companies

Our mission as a business organization is to serve a wide sector of the corporate and government businesses, specifically in the Middle East, as well as the global community. We provide a wide range of products and services that include construction, building materials, gypsum products, insulation products, agriculture, information technology, and trading. We aim to achieve the maximum satisfaction of our customers by providing them with cutting edge technologies tailored to meet their goals, while strictly abiding to health, safety and environmental standards.

# Building **OUR** MISSION

# Building **OUR** VISION

“ MAKE IT REAL ”

To be the largest industrial organization not only on the local market level but also on the global level using high advanced technology, comprehensive quality, high-skilled technical expertise and multiplicity of alternatives at competitive prices.

## OUR CORE VALUES

---

# Building A BETTER LIFE

- Build open and honest relationships with our customers.
- Deliver WOW through our products & services.
- Pursue growth and learning.
- Build a talented team and family spirit.
- Achieve deadlines and meet our customers' satisfaction.
- Accountable for our work in gaining any possible repeat business with customers.

# Construction

WORKS

## SPECIALISED

Contracting & Industries Co.  
Contracting Sector

**Specialized Contracting & Industries Company** is a General civil contractor specialized in implementing national projects in various fields of construction since 1980.

**SCIC** has set a group of programs and policies to face the extension of the present and future works to be able to face the demands on the local and international levels.

The company carries out different technical studies, designs and working drawings, mainly in Egypt in addition to Saudi Arabia and United Arab Emirates.

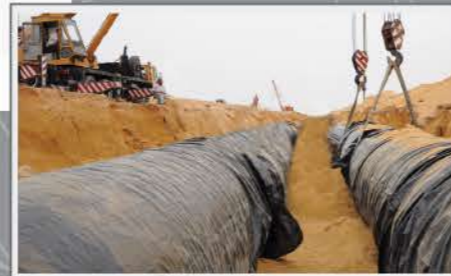

As a result of that, a highly top qualified teamwork of executive management, engineers, technicians, accountants and administrators has been assigned to manage the company's project supported by the company's technical apparatus and equipment.

### Services

SCICs main activities include execution of different types of municipal projects such as:

- Industrial and residential administrative buildings.
- Water and sewage projects, wastewater treatment plants.
- Power stations and dams.
- Hospitals and pump stations for irrigation.
- Electromechanical projects and engineering consultancy etc. ...

"In 2014, Osman Group and Frienergy Ltd, an Egyptian renewable energy company, established a Joint Venture with the scope of offering civil and electromechanical services for the construction of wind and solar farms in Egypt.

Since 1980

## MISR RAYMOND

Misr Raymond Foundations Co.

**Misr Raymond** is a specialized contracting company offering a full range of piling and geotechnical services to the construction industry. It was incorporated in July 1979 under provisions of the Egyptian law No.4.

**Misr Raymond** was originally noted for the famous Raymond Step-Taper pile which was manufactured in sizes and configurations to best meet almost any subsoil conditions and loading requirements. However, since 1984 Misr Raymond has developed and now offers a full range of piling foundation systems, soil investigation, material testing laboratory, and technical support. Misr Raymond has the capability to construct piles of various types according to the site and soil type requirements. Misr Raymond is currently the market leader for marine and land foundations including all types of piles (bored, driven and CFA).

### Scope of Work covered by Misr Raymond:

#### Driven Piles:

- Closed ended and open ended pipe piles
- Combi-wall steel piles
- VibRay driven piles
- Precast piles

**Bored Piles :** Piles range from 600 to 2500 mm and lengths reach up to 70 m deep. The individual pile load capacity reaches up to 1000 tons.

**CFA Piles:** Cfa piles, ground anchors, micro piles and secant piles walls.

### Material Testing and Quality Control Laboratory

Misr Raymond's Laboratory is capable of performing all tests required for concrete and other materials related to the design and construction of all foundation systems, and other structural elements.

### Onshore and Offshore Soil Investigation

The company has an up to date Soil Investigation Department and Soil Mechanics Laboratory capable of performing all tests required for soil parameter evaluation, which is vital for successful foundation and geotechnical design.

Since 1979

## MISR DYWIDAG

M i s r D y w i d a g

**Misr Dywidag** was founded in 1980 as a joint venture between Specialized Contracting & Industries Co. & Dywidag Systems International GmbH, a Dyckerhoff & Widmann Co. of Germany.

Due to DYWIDAG Post Tensioning Systems world renowned reliability and performance, since its establishment MisrDywidag executed most pre-stressed concrete major projects in Egypt.

In 1992 Misr Dywidag took the decision to produce locally Dywidag Post-Tensioning accessories, a few years later the company succeeded to produce the accessories under license of Dywidag Systems International which enabled us to target the market with more competitive prices.

Thinking about perfect results reached, and due to Several Customs exemption agreements between Egypt and surrounding Countries, we started to conquer the African and the Middle East Markets.

### Activity: using prestressed concrete system for constructing of:

- Silos of cement and Aluminum Plants.
- Petroleum Tanks.
- Multi- storey Parking Garages.
- Bridges and Viaducts.
- Tunnels.
- Soil anchoring.
- Lifting and Lowering of Heavy Structures , and Slabs .

Our main concerns are always to combine highest safety and reliability standards with most economical efficiency in our projects, which enabled us to have an extensive track of records in different pre-stressed concrete applications.

Since 1980

# Industry

WORKS

**GIPSINA**

Sina Gips Co.

**GIPSINA Co.**, established in 1981 in Egypt, is the leading Gypsum Powder (Plaster of Paris) producer in Egypt, MENA Region and Africa.

**GIPSINA** plant, with productivity more than 1500 Tons/day, is located in Ras Sedr in Sinai close to the company's gypsum quarries. The company's quarries considered one of the finest gypsum quarries with purity up to 98% and significant reserves not only within MENA Region but also worldwide.

**GYPSON POWDER APPLICATIONS**

**The most important applications of Gypsum Powder are:**

Building products, Construction, Plasterboards, Gypsum fiberboards and Gypsum blocks.

Gypsum Powder is used in the ceramics industry to produce working molds for the slip casting of tableware and sanitaryware in addition to the manufacture of refractory castings as well.

Other uses include not only the production of the general casting of decorative plasterwork and modelling applications but also the manufacture of stucco figurines or pieces.

**Certificates:**

**GIPSINA** has been awarded several International certificates such as; the **International Quality Crown Award London 2009** in recognition of the outstanding commitment to Quality and Excellence, **ISO 9001:2008** for the Quality Management System and **OHSAS 18001:2007** for the occupational health and safety management system.

## CONCRETE PIPE FACTORY

Specialised Contracting & Industries Co.

The Pipes' Factory for precast concrete products, established in 1980, is considered as one of the largest precast concrete manufacturing facilities in the MENA region. The Pipe Factory is specialized not only in manufacturing concrete pipes for various applications but also in designing and manufacturing a wide variety of other precast concrete products .

### Products

- **Prestressed Concrete Cylinder Pipes**  
To be used for high pressure applications such as transmission mains, sewer force mains, industrial drainage, irrigation lines and other applications.
- **Reinforced Concrete Pipes**  
To be used in gravity lines for sewage networks, storm drains, under crossing, irrigation networks, .... etc.
- **Reinforced Concrete Cylinder Pipes**  
To be used for cooling water pipelines at power plants and transmission lines in irrigation.
- **Reinforced Concrete Jacking Pipes**  
To be used for crossings or tunnels under railways, roads, buildings, other busy areas where excavation is not permitted.
- **Reinforced Concrete Jacking Cylinder Pipes**  
To be used for urban water supply and drainage under pressure, cooling water pipelines at power plants, pressure tunnel pipelines, .... etc .
- **Precast Concrete Manholes**  
To be used in sanitary sewers and storm systems for access, observation, change in pipe size and direction.
- **House Connection Chambers**  
To be used for domestic drainage installations.
- **Segmental Tunnels :**  
To be used for large diameters collectors, roads and railways crossings or as shafts for jacking tunnels .
- **Precast Concrete U. Channels**  
To be used in circular sedimentation and treatment plants
- **Precast Wall Panels**  
To be used in high rise offices, residential towers, shopping malls .....etc.
- **Ready Mix Concrete**  
We offer high quality, affordable ready mix concrete.

Since 1980

## INSUMAT

Manufacturing Insulating Materials  
& By Orodacts Co.

**Insumat** is the leading company in the field of waterproofing membrane in Egypt. We produce a wide range of waterproofing products, including varieties that suit all types of construction needs. The company also produces acetylene gas.

**Insumat** was founded in 1975 and it employs more than 600 professionals, working in multiple production units. The company uses the latest manufacturing technologies. An expert team is working to provide complete solutions and troubleshooting for all types of waterproofing and insulation needs. To guarantee top quality and customer satisfaction, all products undergo strict quality control procedures and testing.

### Products & Services

**Annual Production** of Oxidized Bitumen Membrane and Modified Bitumen Membrane exceeds 10 million square meters.

#### • Oxidized Bitumen Membrane

Is produced in all types based on Felt, Jute, Fiberglass, Polyester, or Composite Polyester as per the customers' needs and in full compliance to Egyptian Standard (ES 1395/2005), German Standard (DIN), British Standard (BS), American Society for Testing and Materials (ASTM) and the International Organization for Standardization (ISO).

#### • APP & SBS Modified Bitumen Membrane (Torch apply)

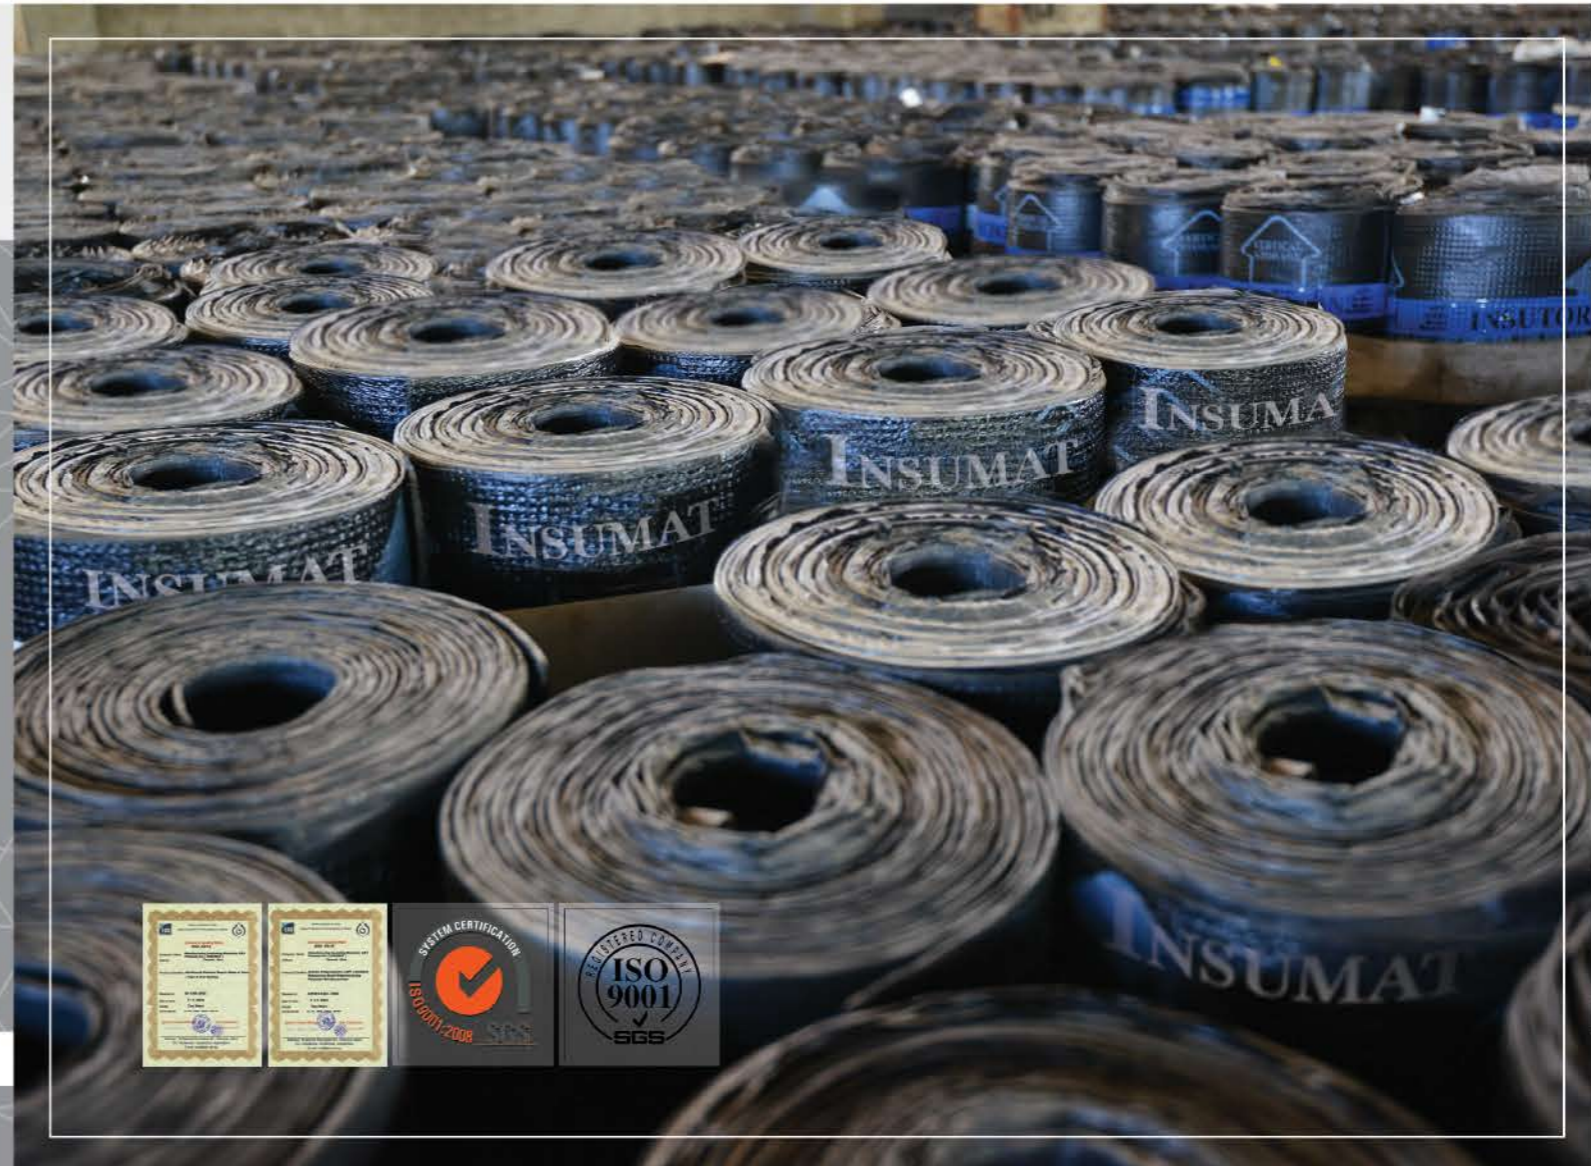

Is produced in different types based on Fiberglass or Polyester, or Composite Polyester as per the customers' needs and in full compliance to Egyptian Standard ES 4125/2003 & ES 4126/2003, UEAtc, UNI, ASTM and ISO standards.

#### • BITUMINOUS EMULSIONS AND SOLUTIONS

- (1) Solvent base
- (2) Water base
- (3) Elastomeric liquid membrane

**Insumat** produces any bituminous membrane with self-protection colored slate flakes and any bituminous solvent base solution, paint, coating and mastics as per the customers' requirements.

**Insumat** has an expert installation team for all kinds of roofing, damp-roofing, sound and thermal insulation. It has been recognized and approval locally and internationally.

Since 1975

## OSMA BOARD

Osmason Complex

**Osmaboard**, part of Osmason Complex established in 2010 and located in Ismailia. Osmaboard is the market leader and the pioneer company in producing different types of gypsum boards and vinyl laminated gypsum tiles.

Using the finest Gypsum powder, extracted from our sister company's quarries "Sina Gips" (Awarded the International Quality Crown London 2009), enables osmaboard to develop and sustain high quality standards throughout the entire manufacturing process.

### Products

- **Osmaboard Gypsum Board Pro** A wide range of gypsum boards is produced in various sizes and thicknesses according to the international standards:
  - Osmaboard GKB (Regular) board for standard applications.
  - Osmaboard GKB1 (Moisture Resistant).
  - Osmaboard GKB2 (Fire Resistant).
- **Osmaboard Metal Section** Galvanized steel profiles used for the substructure of Osmaboard partitions, wall linings and ceilings.
- **Osmaboard Ceiling Tiles** Osmaboard Ceiling Tiles are gypsum based, 600 x 600 mm tiles with PVC laminated front side and/or aluminum foil laminated backside.

### Osmaboard Usages

- Partitions
- Wall lining
- Ceilings
- Shaft walls

## OSMAN PLAST

Osmason Complex

**OsmanPlast**, established in 2010, is not only the leading producer of UPVC pipes in Egypt but also it is the only supplier of HDPE sheets in Egypt.

### UPVC Pipes

**Osmanplast** produces a wide range of UPVC pipes with diameter from 50 mm up to 630 mm, according to the highest German and Egyptian standards of quality. This means more diversified applications such as sewer system, water supply and irrigation systems in addition to electrical conduits.

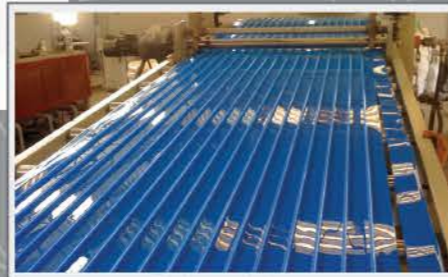

### HDPE Sheets

**Osmanplast** owns the only Egyptian HDPE concrete liners. Osmanplast provides the local and international markets with high quality and cost effective HDPE with thickness range from 1mm to 5mm. The HDPE sheets offer a solid protection against chemicals, erosion and water submerision.

**OsmanPlast HDPE sheets** are used in the concrete pipes lining, fertilizer storing facilities, chemicals discharge lines, water reservoirs and waste treatment facilities.

### Products

- UPVC Pressure pipes System used for water extraction, water distribution, and drainage manufactured according to the Egyptian Standards 848 and Din 8061/8062.
- UPVC Sewer (Gravity) UPVC PipeDIN19534 as per Egyptian standards 1717 for 2001.
- UPVC Drain (Above Ground) UPVC Pipe DIN19531.
- UPVC plumbing system for drainage as per the US standards ASTM D 1785 ,ASTM D 2241 and the British standards BS 3506.
- UPVC electrical ducts according to TC 161A.
- HDPE Concrete liner flat.
- HDPE T-RIB concrete liner. T-Rib

## OSMA KRAFT

Osmason Complex

**Osmakraft**, one of Osmason Complex entities, established in 2010 and located in Ismailia.

**Osmakraft** is specialized in producing sack kraft paper valve bags for industrial packaging purposes. Osmakraft produces paper bags for powdered goods, raw material bags, starch bags as well as various environmental paper bags.

**Osmakraft** owns a highly speed, fully automated and bottom based production line. Using only the finest sack Kraft paper and adhesives, Osmakraft ensures excellent strength properties, porosity suitable for fast and dust-free filling of powdered goods.

### Products

#### Sack Kraft paper valve bags

- Bag length range: 420-750 mm
- Bag width range: 380-550 mm
- Bag Bottom Range: 90-130 mm

### Specifications

- 2-4 layers of sack Kraft paper bags
- Sewed thread pasting paper bags
- 1-4 color printed bags
- PE/PP plastic Velum on inner or middle layers

**QUARICO**

Arab Quarry Products Co.

**Quarico**, established in 1974, is specialized in producing different grades of limestone and dolomite chippings, which can be used in various applications such as road construction and sugar refineries.

#### Applications

The limestone and dolomite chippings, can be used in the following applications:

- Road construction
- Cement bricks industry
- Refineries in the sugar industry
- Refineries in iron and steel industry
- Animal food industry as a source of Calcium
- Filler in insulation industry
- Filler in plastic industry

Therefore, Quarico serves the market's leaders in various in-

- Ezz Steel
- Plena
- Delta Sugar Company
- Dakahlia Sugar Company
- Gharbiah Animal Food Plants
- El Wafaa Farm Co
- Insumat

## TECHNO CRETE

The Engineering Concrete Products Co.

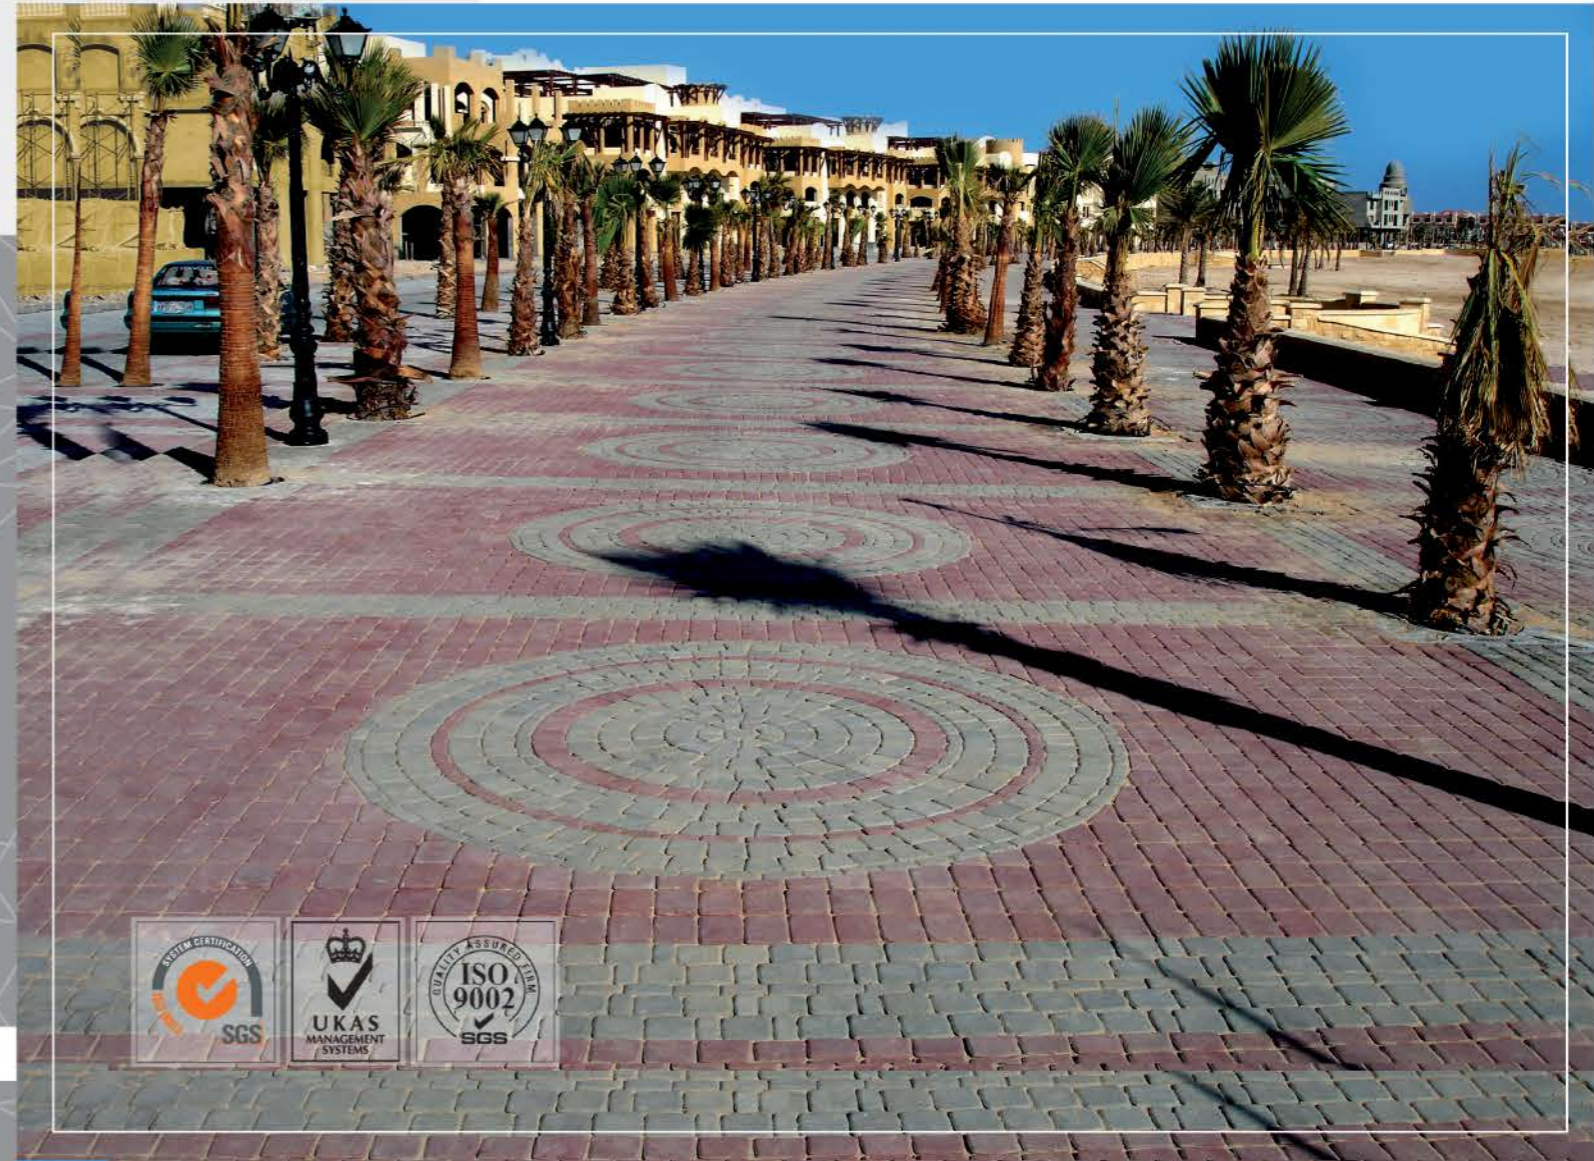

**Technocrete**, established in 1977, is considered the leading company in the field of manufacturing interlocking pavers, and precast concrete products. With a capital increase of 25 million EGP in 2016, the company was able to add the latest international machines and production lines to reach the international standards of quality. The company employs over 400 professionals in three major plant locations: 10th of Ramadan, Ismailia and Al Menia.

### Products

The company is specialized in manufacturing

- Precast interlocking pavers.
- Mosaic.
- Concrete curbs.
- Technotiles.
- Solid and hollow concrete blocks.
- Reinforced concrete manholes.
- Inspection chambers.
- Traffic barriers.
- Concrete furniture.

Upon customer request, interlocking pavers are produced to meet the international recognized standards/specifications.

## EL WAFAA FARM Co.

For the growth & development of fish, poultry and livestock

**El Wafaa Farm Co.** was established in 1984 and has since been a leader in the production of poultry; mainly Sasso Chicken and Muscovy and Mule Ducks. The Company is the sole agent in Egypt for both French companies: **Sasso** in chicken; and **GRIMAUD FRERES** in Muscovy Ducks.

Aside from the production of poultry, El Wafaa Farm Co. also produces Hy-Plus Rabbit and many various species of marine fish. The Marine Hatchery, located just outside Ismailia by the Suez, specializes in the production of Seabass and Seabream larvae, fingerlings and fish.

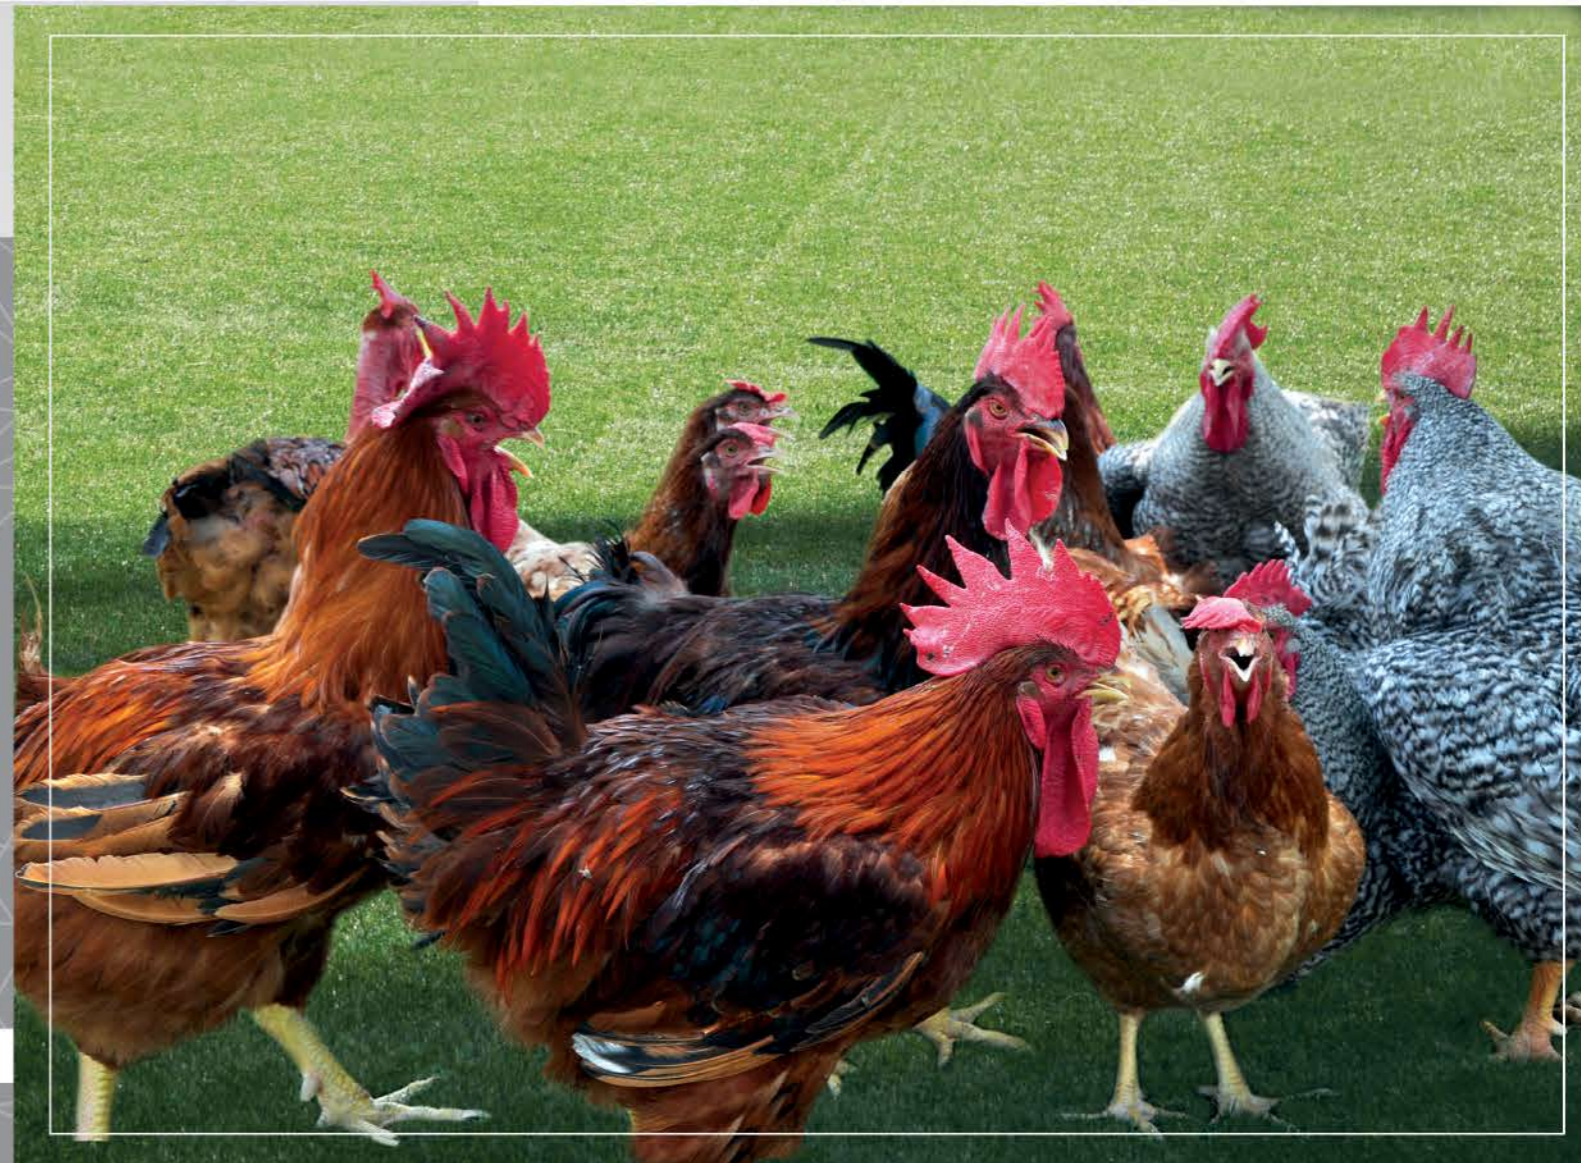

**El Wafaa Farm Co.** strives to be environmentally friendly and health conscious by ensuring sustainable practices within all of its sectors. The company produces its own vegetarian feed to ensure the quality and security of its farmed products. Its aim is to provide the country with the highest quality of duck, chicken, fish and rabbit by using the latest technology in order to come up with red meat alternatives.

### Our products

- Day old Muscovy duck.
- Day old Mule duck.
- Day old Sasso chicken.
- Marine fish.
- Hy plus rabbit.
- Fresh and frozen meat products.

**El Wafaa Farm Co.** was the first company in Egypt to receive the ISO 9001 in the production, sales and marketing of Muscovy ducks. In 2012, El Wafaa Farm Co. built its first slaughterhouse and shortly after received the ISO 2200 in the slaughter, cooling, and freezing of poultry.

Since 1984

**OGTech**

for Electronics and Information Technology

**OGTech**, is a systems integration company specialized in providing RFID solutions. We played a significant role in introducing Radio Frequency Identification (RFID) technology to the Middle East and North Africa (MENA) region, with a special emphasis on Egypt and GCC area. OGTech offers customizable RFID solutions, combining the latest top-quality hardware available on the market and state-of-the-art software developed by our in-house programming pioneers, which allow businesses to fully utilize various ventures. We take pride in being an RFID market leader in the region. Since our establishment in 2007, OGTech has been focused on quality, innovation and combining the highest competences of our international partners.

**Some of our Applications:**

- **Smart Gate** an RFID powered vehicle access control application that allows users to enter a designated area through automatic identification.
- **Fixed Assets Management System (FAMS)** an RFID powered fixed assets management application that drastically simplifies asset tracking and management.
- **Book App** an RFID powered library management system that enables you to optimize library operations.
- **Warehouse Management System** an RFID powered warehouse management application that makes the process of warehouse management more straightforward and effortless.
- **Clock-In** an RFID powered attendance control system that allows you to monitor punctuality and attendance.
- **Access Control System** an RFID powered access control system that limits access of designated areas to authorized personnel only.
- **Auto-Lock** an electronic combination lock that has been designed to provide a high security keyless locking solution for lockers and cabinets.
- **Smart Care Clock** a powerful system with a user-friendly interface enhanced by RFID technology that helps in managing your nursery easily and very accurately.

# Overseas

WORKS

# CAL SOUTHWEST CONSTRUCTION

**Cal Southwest Construction, Inc** was originally incorporated in 1985 in San Diego, California, USA and has participated in general engineering construction including sewage and water treatment plants, pumping stations, water distribution systems, water reservoir and chlorination facilities. It has executed over 50 projects within the state of California. Cal Southwest Construction, Inc. has been awarded twice by the City of San Diego as "Contractor of the Year".

### Company Strategy

In addition to participating in general engineering works in the USA, Cal Southwest Construction, Inc. started to enter the Egyptian, Arab and African markets through projects funded by USAID in the field of electromechanical works while at the same time increasing its market share in the United States.

Cal Southwest/Specialized Contracting Joint Venture offers a complete range of construction & engineering services for both local and overseas projects. The Joint Venture has proven substantial reliability in the fields of project management, detail engineering, procurement and construction.

In the past five years, both Specialized Contracting & Cal Southwest have been exploring the local construction industry in Egypt and accordingly, both companies have established their offices in the area. Through competitive bidding, Specialized Contracting has been awarded a considerable amount of work in a very short period. One of the most prestigious projects was "The Salvation Of The Karnak Temple".
